

In July 2006 Direct Couriers commissioned the services of Property Search to help in the relocation of its Groups Head Office in Artarmon. A move to a larger ware house facility based in the Botany, Mascot area was the objective.

Both Fred and Michelle were involved in the initial briefing which was specifically designed so as not to involve the Directors in the day to day research and viewing of the large amount of available properties.

After a number of intensive discussions Property Search were able to ascertain our full requirements. Comprehensive documentation was supplied detailing our spec and armed with this information Fred and Michelle were now able to go into the market to seek our desired property.

Within a few weeks and a number of site visits Direct were able to narrow down its most suitable property. Site inspections were arranged at our convenience and ongoing reporting was provided during the entire search. Property Search's detail to information was accurate and very easy to comprehend. Fred, has continuously kept us informed of market conditions during our entire search. He has fed us information that has been invaluable. During our DA application he supplied us with a variety of consultants to help in the successful process with Botany Council.

The service provided by Fred has been first class to say the least. It has allowed myself and my fellow Directors the opportunity to continue with the day to day running our business while he continued to ensure we found the desired property.

I am confident to say the board of Direct Couriers would unreservedly refer Property Search to any organization in the pursuit of their desired property. They not only found our property but they went far and beyond our expectations in every aspect.

Yours Sincerely

Barry Reichman
Managing Director
